

Final Office Action dated April 18, 2005
Response to Final Office Action dated October 18, 2005

Application No. 10/012,220

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

1. Cancelled.
2. (Previously Presented) A mobile telecommunications device according to claim 17, wherein the list of options in a sub menu changes depending on the status of the selected call.
3. (Previously Presented) A mobile telecommunications device according to claim 17 wherein the list of options in a sub-menu changes depending on the status of the unselected pending calls.
4. (Previously Presented) A mobile telecommunications device according to claim 17, wherein the call selected from the menu is identified on the sub-menu adjacent the list of options associated with the selected call.
5. (Original) A mobile telecommunications device according to claim 4, wherein the control unit is configured to display the status of the selected call in the sub-menu.
6. (Previously Presented) A mobile telecommunications device according to claim 17, wherein the control unit is configured to display the status of each pending call in the menu.
7. (Previously Presented) A mobile telecommunications device according to claim 17, wherein the control unit includes a scroll key and an option key configured such that the user can highlight a pending call in the menu using the scroll key and select said highlighted call by pressing the option key.

Application No. 10/02,220

8. (Original) A mobile telecommunications device according to claim 7, wherein the control unit includes a selection key having a function dependent on the status of the highlighted call when the menu of pending calls is displayed.

9. (Original) A mobile telecommunications device according to claim 7, wherein the control unit includes a selection key having a function dependent on the status of other pending calls when the menu of pending calls is displayed.

10. (Original) A mobile telecommunications device according to claim 8, wherein the function associated with the selection key may be performed by actuating the selection key after highlighting a call in the menu and before selecting that call to display a sub-menu listing call handling options associated with the selected call.

11. (Previously Presented) A mobile telecommunications device according to claim 17, comprising a mobile telephone.

12. Cancelled.

13. (Previously Presented) A method according to claim 20, wherein the control unit includes a scroll key and the step of selecting a pending call from the menu includes operating the scroll key to highlight a call in the menu.

14. (Original) A method according to claim 13, wherein the control unit includes an option key and the step of selecting a call from the menu includes operating the option key to display the sub-menu listing call handling options associated with the highlighted call.

15. (Original) A method according to claim 14, wherein the control unit includes a selection key having a function dependent on the status of the highlighted call when the menu of pending calls is displayed, the method including the step of actuating the selection key after

highlighting a call in the menu to perform said function and before selecting that call to display a sub-menu listing call handling options associated with the selected call.

16. (Previously Presented) A computer including a memory and a microcontroller, the memory storing a program executable by the microcontroller to carry out the method of call handling according to claim 20.

17. (Currently Amended) A mobile telecommunications device including a display and a control unit configured to show a list of pending calls on the display for multiple call handling simultaneously during in-call operation, wherein the mobile telecommunications device is receiving or initiating the pending calls, and said list includes at least two calls being selectable by a user, and upon selection of one of said at least two calls, the control unit displays a sub-menu listing call handling options specific to the selected call.

18. (Previously Presented) A mobile telecommunications device according to claim 17 comprising:

a plurality of call handling keys; and wherein

the call handling keys are operated to signal the control unit to select one of the at least two calls and thereafter to activate further actions to be taken by the control unit.

19. (Previously Presented) A mobile telecommunications device according to claim 18 wherein:

one of the call handling keys is operated to end the selected one of the at least two calls.

20. (Currently Amended) A method of handling multiple calls in a mobile telecommunications device including a display and a control unit comprising showing a list of pending calls on the display for multiple call handling simultaneously during in-call operation, wherein the mobile telecommunications device is receiving or initiating the pending calls, and

said list including at least two calls being selectable by a user, selecting of one of said at least two calls, and the control unit controlling display of a sub-menu listing call handling options specific to the selected call.

21. (Previously Presented) A method in accordance with claim 20 comprising:
the mobile telecommunication device comprises a plurality of call handling keys and
wherein

the call handling keys are operated to signal the control unit to select one of the at least two calls and thereafter to activate further actions to be taken by the control unit.

22. (Previously Presented) A method in accordance with claim 21 wherein:
one of the call handling keys is operated to end the selected one of the at least two calls.
